

# TECTURA CLOUD SERVICES

## Technology on Your Terms

### WHY TECTURA CLOUD?

- LEVERAGE STATE-OF-THE ART TECHNOLOGY
- DEVELOP AND DEPLOY SOLUTIONS QUICKLY
- MINIMIZE UP-FRONT INVESTMENTS
- REDUCE DEPENDENCE ON INTERNAL IT RESOURCES
- SUPPORT GROWTH THROUGH SCALABILITY

### ENSURE GROWTH BY SCALING TECHNOLOGY WITHOUT MAJOR UPFRONT COST

Technology is the backbone of a successful business, so it's important to get it right. In the past companies had to commit to large capital expenses to gain access to the latest technology solutions in order to keep up with market demands. All that changed with cloud computing. Today, business executives recognize that an outsourced technology model also provides access to best practices, enhanced security and expert knowledge almost impossible to match with in-house resources. We can help you develop a technology strategy for implementing your business management solution on-premise, hosted, or as a hybrid solution. Whether you are a start-up company or a more mature business, Tectura Cloud Services allow you to optimize your solution to achieve greater agility while controlling costs.

### WHY CONSIDER MOVING TO A CLOUD MODEL?

Our services provide you with complete ownership of your cloud-adoption life cycle and are backed by our expert knowledge and global reach. When partnering with us you leverage a best-of-breed cloud ecosystem with the convenience of a single point of accountability. All you need is an internet connection to run your ERP solution tailored to your business needs. Because it's hosted in the cloud, you simply log in through a web browser to harness all the capabilities of an end-to-end business management solution supporting your growth initiatives by scaling rapidly and adding functionality with minimal disruption.

Leveraging cloud services allows you to:

- Effectively manage your cash flow
- Accelerate return on investment and reduce total cost of ownership
- Upgrade faster and more seamlessly
- Increase agility and quickly respond to market demands

### THE POWER OF CHOICE

You want to focus on your business not your technology. Cloud solutions enable you to optimize your business processes allowing for more flexibility in responding quickly to changing market demands while minimizing maintenance costs. Our on-demand hosting solutions give you the power to choose between different deployment options and cloud services that are right for your business. Our consulting experts will work closely with your team to define the scope of your application requirements. You may choose from a variety of professional services for your cloud environment including:

TECTURA®

- **Cloud Strategy & Planning** – developing and implementing a cloud roadmap
- **Cloud Enablement** – establishing secure, private, hybrid, and service provider clouds
- **Cloud Brokerage** – bringing together private and public clouds, and enterprise assets
- **Cloud Migration** – onboarding and best-in-class business services
- **Cloud Application Development** – developing solutions for native cloud services
- **Cloud Security** – delivering secure hybrid cloud services
- **Cloud Sustenance** – ensuring quality of service (QoS) and ecosystem governance

### BUILDING THE FOUNDATION FOR YOUR NEXT GENERATION BUSINESS

To maintain a competitive edge you not only have to make sure your business operates efficiently today – you also have to anticipate how changes in the market environment may affect your technology requirements. You want peace of mind that the investment you make today will be protected as your business grows. Our cloud services give you confidence that your business has the foundation to expand without outgrowing your technology resources. Leverage the cloud to better connect people, extend processes, and achieve higher levels of productivity today and in the future.
